Dear Colleagues, dear Friends

On Behalf of the Scientific Committee, we are glad to announce the seventh North-American Training Course in Stereo-ElectroEncephaloGraphy (SEEG), which will be held from September 16 to 20, 2018.

This new course will deal with **SEEG for bilateral asymmetric tonic seizures**.

As last years, participants will primarily train on real patient’s data under the supervision of SEEG experts from the experienced centers of Chicago, Freiburg, Grenoble, Lausanne, London, Marseille, Miami, Milano, Montreal, Parma, Rennes, Rome and Sidney.

After reviewing digitized video-scalp-EEG, MRI, and PET data, each group will have to decide on whether to perform and how to design an optimal SEEG investigation. They will then review and analyze SEEG findings, and eventually recommend a surgical decision. Each group conclusions will be thoroughly discussed during plenary sessions.

**Plenary sessions** will also include an introductory conference on the spectrum of tonic seizures, as well as lectures on the frontal, parietal and insular networks that underly motor behaviour and tonic seizures, the evolution of seizure semiology with age, and the role of direct electrical stimulation to better understand seizure semiology.

Once again, we are very happy to welcome you in the amazing Sacacomie venue.

With our best regards,

---
